Q1. Write and perform SQL queries. Create a School database create a table of student (Enter 10 records of student). Add following Info on table (Sr.No.,Roll_No, Stud_Name,DOB,Age, Mob_Num, Address,STD,Fees, Remark)
1) Perform Insert, Update, and Delete command.
2) Display 10 records sort asc order by name
3) Display std_name and pending fees of a student
4) Draw ER diagram of school

Q2. Write and perform SQL queries. Create a College database and Create a student table (Enter 10 records of student) Add following Info on table (Sr.No.,Roll_No, Stud_Name,DOB, Age,Mob_Num, Address, Branch Name ,Year, Fees, Remark)
1) Perform Alter, Insert, Drop,Rename command.
2) Display std_name and pending fees of a student
4) Draw ER diagram of college.

Q.3 Write and perform SQL queries. Create a Company database and Create a employee table. Insert following Info on table (Sr.No.,EmpID, EMP_Name, Joining date, emp position, Depart_Name, dep_no,DOB, Age, Mob_Num, Address, Salary, IN_OUT Time) Insert 10 records of employee (Solve any 4)
1) Display Name ,and who stay in Mumbai or Pune
2) Display Name of emp who salary are less than 50000
3) Remove the record of employees whose dep_no. is 10
4) Use alter and truncate command
5) Display 10 records sort asc order by name
6) Add column of Remark

Q4. Write and perform SQL queries
1) Take any example and Perform on DCL Commands.
2) Draw ER diagram of Company

Q5. Write and perform SQL queries Create a Company database and Create customer table. Insert 10 records of following Info on table (Sr.No.,Cust_ID, Cust _Name,Product_Name, cost,Purchase Date, Mob_Num, Address, purchase time Time,remark) (Solve any 4)
1) Display 10 records sort asc order by name.
2) Display Name,cust_ID,prod_name column.
3) Add column of Delivery date
4) Use alter and modify command
5) Display cust_name, and >500 cost of product
6) Delete database

Q6. Write and perform SQL queries
1) Take any example and Perform on TCL Commands.
2) Draw ER diagram of Library.

Q7. Write and perform SQL queries. Create a Student database and Create Exam table of two(2 different course). Insert 10 records of following Info on table (Sr.No.,stud_enrollmentID,sud_name,sub_name(any 5),sub_marks, percentage, Result) (Solve any 4)
1) Display name of student who got min marks
2) Display count of students fail in subject
3) Display avg. marks of student
4) Display names of students whose name start with ‘A’ by arranging them in ascending order of sub marks
5) Display two table Use full join
6) Display stud_enrollmentID,name, Result using left join

Q8. Write and perform SQL queries. Create a library database and Create sudent table of two(2 different course). Insert 7 records of following Info on table (Sr.No.,stud_enrollmentID,sud_name,sub_name, STD, mon_no, address, Issue date, return date, latemark fee,) (Solve any 4)
1) Display name of student and late mark fees
2) Display use inner join sud name,sub_name, late mark fees
3) Add remark column
4) Display names arranging them in ascending order
5) Display two table Use full join
6) Display stud_enrollmentID,name, Result using left join

Q.9 Write and perform SQL queries. Create a Company database and Create a employee table. Insert following Info on table (Sr.No.,EmpID, EMP_FirstName, EMP_LastName Joining date, emp position, Depart_Name, dep_no,DOB, Age, Mob_Num, Address, sales earning, salary) Insert 10 records of employee. (Solve any 4)
1) Display all columns from the employees table.
2) Retrieve the first name, last name, and salary of all employees
3) Find all employees in 'Sales' earning > 50,000
4) List employees hired after Jan 1, 2024, by newest first.
5) Display 10 records sort asc order by name
6) Calculate the average salary across the company.

Q10.Write SQL code for creating of View (college insert 10 record )
1) Perform operations Insert, Modify, Delete records through view, Delete the View.
2) Draw ER diagram of Railway reservation.

Q11. Write and perform SQL queries. Create a Hospital database and Create a patient table (Enter 10 records of patient) Add following Info on table (Sr.No., patientID, patient name, patient disease , doctor name,age,consultation date/ time ,consultation fees,payment details ,mob num, address, Remark)
1) Perform DDL command
2) Display patientID, consultation date/ time(show in asc order)
3) Draw ER diagram of hospital.

Q12. Write and perform SQL queries. Create a Railway Reservation database and Create a customer table (Enter 10 records of customer) Add following Info on table (Sr.No., Name ,ticket ID, age, mob_no,address, aadhar numder, reservation date,destination name, seat number, Remark)
1) Perform DML command
2) Display ticket ID, reservation date , seat number
3) Draw ER diagram of Railway Reservation.

Q13. Write and Perform PL/SQL code
1) Write a program to find largest of two numbers
2) Write a program to print numbers 1 to 5 using EXIT WHEN condition.

Q14. Write and Perform PL/SQL code
1) Write a program to find maximum of three numbers
2) Write a program to print numbers 1 to 5 (use IF THEN).

Q15. Write and Perform PL/SQL code
1) Write a program to find largest of two numbers
2) Write a program to print numbers 1 to 5 using EXIT WHEN condition.

Q16. Write and Perform PL/SQL code
1) Write a program to find maximum of three numbers
2) Write a program to print numbers 1 to 5 (use WHILE LOOP).

Q17. Write and Perform PL/SQL code
1) Write a program to check whether specified employee is present in EMP table or not. Accept empno from user. If employee does not exist.
2) Write a program to print odd numbers from 1 to 10.
